

Clearhead Download Instructions

The recording lasts for just over an hour and will stream/play in your media player as it is downloading.

Important! Do not close the window or media player if you are downloading the track for the first time.

Closing the window or media player before it has finished downloading means you will have to start the download again with a new key. Your purchase gives you **three** download keys. *Download keys are a uniquely generated code, which allow you to play and download the track*

When the download has played the first time, you can save the recording on to your computer by right clicking on the Clearhead download title in your media player this will allow you to either save it as part of a playlist or into a folder of your choice.

How long this part of the process takes depends on the speed of your internet connection.

Any problems
